Official Information Act request

Thank you for your email of Tuesday 23 January 2024, in which you requested information about our ICT roles.

The Social Wellbeing Agency is the advanced data, analytics, and insights agency for the social sector. We provide independent, evidence-based advice on enduring, topical, and important social issues for Aotearoa New Zealand. Our role is to make it easier for the social system to understand, decide on, and do more of what really works, for better lives.

We are a departmental agency hosted by Te Kawa Mataaho Public Service Commission. We receive ICT services from the Ministry of Social Development as part of a shared services agreement and do not employ staff for internal-facing ICT roles. We have one role which provides administrative technical ICT support to staff as a portion of their broader administrative role.

We do, however, employ staff in ICT and digital roles as part of our work to provide decision-makers with data, insights and tools that support better decision making. These staff support the Agency’s data and analytics platform and the provision of data dashboards which are used by staff within the wider public service. A number of these roles are fixed-term as we develop new regional data dashboards.

The table below sets out the staff that we have in the ICT and digital roles as at 31 January 2024, noting they do not provide ICT services internally to our agency. We do not currently employ any contractors, casuals, or consultants.
